# Sika Waterbars®

Product	Flexible PVC (Thermoplast) waterstops to seal construction and expansion joints in
Description	concrete structures. Various types of Sika Waterbars® are available in different
2000p	sizes depending on there intended use.
Uses	Sika Waterbars <sup>®</sup> is used to seal construction and expansion joins in water retaining
	structures such as reservoirs, water towers, dams, spillways, canals, swimming
	pools. Sewage tanks etc as well as to keep water out of concrete structures such
	as basements, underground car parks, tunnels, subways retaining walls etc
Advantages	■ Multi rib sections of the tortuous path principal.
	■ High quality PVC for long durability.
	■ Easy to install (clip fastening), easy to weld on site.
	Factory produced cross sections available.
	Suitable for high water pressure.
	Many different types and sizes available.
	Special oil and bitumen resistant as well as reinforced types on request.
Specification	Comply to the outline requirements for the international specification.
	B.S. 2571 and B.S. 2782.
	DIN 1841 (Part-2).
	ASTM-D-2628 and CRD-C0572-U.S corps of engineers specifications &
	requirements. ■ J.I.S Japanese imperial standards.
Information on standards	ASTM-D 2628
illioilliation on standards	States Min. elongation at break 350%
	Min. tensile 13.8 N/mm <sup>2</sup> .
	British standards elongation at break 320% Minimum.
	BS 257 1-1990 Tensile 9 N/mm <sup>2</sup> Minimum.

# Application Selection

The selection of a suitable waterbar is governed by the type of joint, concrete thickness, grade of concrete, reinforcement position, expected movement (expansion/shear) as well as waterhead to which it is to be exposed to

### General Guide lines:

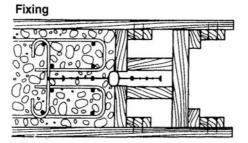

- Experience has shown that application of a few simple rules will ensure a satisfactory result.
- The overhall width of the waterbar should be at little less or equal to the thickness of the concrete slab into which it is placed.
- The overall width of the waterbar should be at least six times the size of the largest aggregate used.
- For optimum results, centrally placed waterbars are prefered

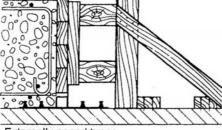

### **Fixation**

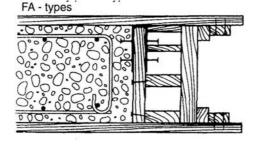

Proper fixing of the waterbars to the reinforcement (or formwork) is essential, as are careful pouring and compaction of the concrete. Fixing clips for internally placed waterbars are available.

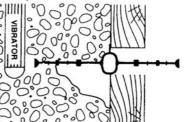

Centrally placed types

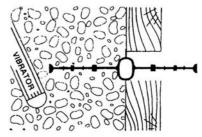

Externally paced types

Wrong

Correct

Welding Waterbars	Sika Waterbars® are made from thermoplastic PVC and can therefore be welded
_	easily. The ends are secured in a welding jig (available for each type) and heated
	with suitable welding equipment is then removed and the molten ends pressed
	together firmly.

### Junction Pieces

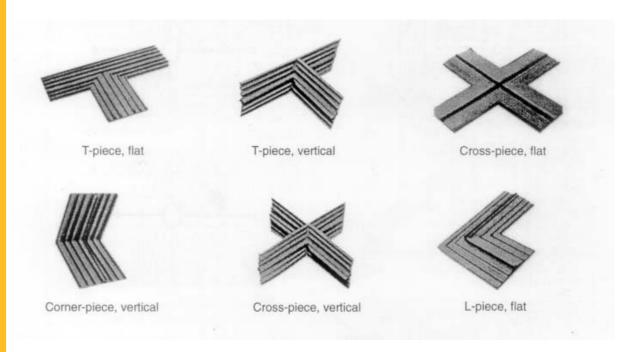

Junction pieces can easily be manufactured on site. However, a wide range of standardized, factory made junction pieces, are available. All having a 30 cm free leg allowing easy on site welding to Sika Waterbars<sup>®</sup>, for non standard junction pieces drawings giving exact measurements and angle details are required.

Junction Pieces					
materiai requ Type	Material requirement and number and type of welding.  Type Material* Welding – type				
Cross-piece	flat	1.20 m + 2,0 x width	2 mitre-weldings		
Cross-piece,	Vertical	1.20 m	2 butt-weldings		
T-piece	flat	0.90 m – 1.5 x width	1 mitre-welding		
T-piece	Vertical	0.09 m	1 butt-welding		
L-piece	flat	0.60 m – 2.0 x width	1 mitre-welding		
Comer-piece	Vertical	0.60 m,	1 butt-welding		
* Free Wing: 30 cm (all)					

## Legal notes

The information and in particular the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of products when properly stored, handled and applied under normal conditions. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users should always refer to the most recent issue of the technical data sheet for the product concerned, copies of which will be supplied on request.
